Eine Verwendung derartiger Angaben in Rechnungen an den Fahrzeugbesitzer ist nicht statthaft.

Reparaturlösungen von Profis für Profis

Seit 1883 ist FAG der Profi für Präzisionslager. Diese langjährige Erfahrung bei einem so stark beanspruchten Teil wie dem Radlager ist ein großer Vorteil für die Werkstatt. Sie profitiert vom FAG-Know-how. Seit 2005 ist das Radlagersatzprogramm von FAG im Ersatzteilmarkt verfügbar. Heute gehören sie zu den am gefragtesten Radlagern. Werkstattprofis schätzen Qualität und setzen daher auf die große Erfahrung von FAG.

Ihnen ist die Langlebigkeit und Präzision der von ihnen verbauten Teile besonders wichtig. Weil FAG darauf achtet, dass jede Reparatur so einfach wie möglich gelingt, befinden sich in den FAG-Verpackungen neben dem Radlager sämtliche Zubehörteile, die für die professionelle Reparatur notwendig sind.

Und gerade diese zusätzlichen Teile machen den Unterschied aus: Die mit verschiedenen Sicherungssystemen ausgestattete Schrauben und Muttern sind perfekt auf das jeweilige Radlager und Fahrzeug abgestimmt. Denn eine perfekte Reparaturlösung ist die Summe ihrer Einzelteile – in hoher Qualität und mit den dazugehörigen Services. So wird erreicht, dass

- der Sitz des Radlagers im Achsschenkel gesichert ist,
- die Vorspannung des Radlagers auf Dauer erhalten bleibt,
- ein optimaler Rundlauf gesichert wird,
- unnötiger Verschleiß und eventueller Ausfall des Radlagers vermieden wird.

Radlager und das dazu passende Zubehör sind als ein System zu sehen. Die Qualität und das intelligente Zubehör sind die essentiellen Bausteine des Sicherheitskonzepts. **Zusammen ergeben sie das FAG Sicherheitssystem, dem Sie jederzeit vertrauen können.**

FAG weiß: Zeit ist Geld. Deshalb enthalten unsere Verpackungen zusätzlich non-verbale Einbauanleitungen, wenn diese notwendig sind. Damit kommen Sie schnell zum Ziel. Wer doch einmal Unterstützung benötigt, findet auf dem Werkstattportal REXPERT die nötigen technischen Informationen zu allen Artikeln aus dem Hause FAG. Darüber hinaus steht unsere kostenlose Service Hotline zur Verfügung.

Darum lohnt es sich, auf FAG Radlager zu setzen

Radlager sind sicherheitsrelevante Bauteile. Bei FAG ist Qualität auf allen Ebenen selbstverständlich. Material, Entwicklung, Fertigung und Tests erfüllen höchste Ansprüche. Die größte Marktabdeckung im Bereich PKW hebt FAG besonders aus dem Kreis der Wettbewerber hervor. Doch nicht nur das spricht für die Marke – mit patentierten Innovationen ist FAG ein bevorzugter Entwicklungspartner der Automobilindustrie, treibt stetig die Weiterentwicklung voran und bietet für alle Problemstellungen die angemessene Lösung.

1 Standard-Kegelrollenlager
zerlegbares Kegelrollenlager

2 Generation 1
2-reihiges Schrägkugellager mit/ohne Multipolencoder

3 Generation 1T
2-reihiges Kegelrollenlager mit/ohne Multipolencoder

4 Generation 1
2-reihiges Schrägkugellager mit Sperrkranz und mit/ohne Multipolencoder

5 Generation 2
2-reihiges, abgedichtetes Schrägkugellager mit konventionellem Encoder

6 Generation 2
2-reihiges, abgedichtetes Schrägkugellager mit Multipolencoder

7 Generation 2D
2-reihiges, abgedichtetes Kegelrollenlager

Innovationen von FAG sind richtungweisend für die Automobilindustrie. So hat FAG nicht nur die Kugelschleifmaschine für perfekte Kugeln erfunden und patentiert und damit die Industrialisierung der Wälzlagerfertigung eingeleitet. Mit der Erfindung des Wälznietbunds sorgte FAG dafür, dass die Vorspannung des Lagers von Anfang an definiert und voreingestellt ist. Damit ist der Radlagerwechsel einfacher und sicherer geworden. Der Sperrkranz und die Stirnverzahnung tragen zu mehr Sicherheit und schnelleren Reparaturvorgängen bei. Gleichzeitig schützt die Leichtlaufdichtung LFT die modernen FAG Radlager sehr wirksam vor Verschmutzungen und sorgt gleichzeitig für mehr Effizienz durch weniger Reibung.

8 Generation 2.1

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund, Multipolencoder und Sperrkranz

9 Generation 2.1

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund, Multipolencoder und Sperrkranz

10 Generation 3

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund

11 Generation 3

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund, Multipolencoder und Sensor

12 Generation 3.2

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund und Multipolencoder

13 Generation 3.2

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund, Multipolencoder, Stirnverzahnung und Leichtlaufdichtung

Spezialwerkzeug

FAG Radlager-Reparaturlösung für Transporter,
Art.Nr. 400 6199 10

Ein Radlager-Schaden ist keine große Sache, solange es sich nicht um eine Achsträger-Radlager-Einheit handelt. Dadurch muss bei der Instandsetzung der komplette Achsträger mit integriertem Radlager ausgetauscht werden.

Bei der FAG Radlager-Reparaturlösung für Transporter werden nur noch die Lager selbst gewechselt und sonst nichts!

Die effektive Lösung spart mehr als 50 % der Gesamtkosten und viele Handgriffe.

Lagerschäden treten bekanntlich bei hohen Laufleistungen und starker Belastung auf (wie z.B. schlechte Straßenbedingungen, Bordsteinrempler und übermäßige Beladung). Gewerblich genutzte Fahrzeuge sind darum besonders häufig betroffen. Die Mercedes-Modelle Vito, Viano und Sprinter sowie der VW Crafter sind werksseitig mit fest verbauten Radlagern im Achsträger ausgerüstet.

Längere Reparaturzeiten bedeuten für Unternehmen und Flottenbetreiber nicht

nur einen hohen Zeitverlust, sondern auch entgangenen Umsatz. Mit der FAG Reparaturlösung werden die Standzeiten minimiert. Ein starkes Argument für die Werkstatt und die beste Lösung für hohe Kundenbindung und Zufriedenheit.

Schneller auf Achse!

Weit mehr als 60 % Zeitersparnis gegenüber einer herkömmlichen Reparatur verschaffen klare Vorteile. Die kostengünstigere und schnellere Instandsetzung setzt neue Maßstäbe. Statt langer Standzeiten mehr Spielraum bei der Zeitplanung in der Werkstatt.

Ohne Achsvermessung, ohne Achsträgerwechsel – Aus- und Einbau des Achsträgers und die damit verbundene Achsvermessung entfallen vollständig.

Die FAG Radlager-Reparaturlösung für Transporter ist die beste Boxenstopp-Strategie für mehr Effizienz in jeder Werkstatt.

Repair solutions – By professionals, for professionals

FAG is the expert in precision bearings since 1883. The company's many years of experience in manufacturing wheel bearings – a part that is in particularly high demand – is a considerable advantage for garages. They benefit from FAG's expertise. FAG's range of wheel bearing sets is available to the spare parts market since 2005, and they are now among the most sought-after products of their kind. Garage experts appreciate quality, which is why they rely on FAG's experience.

For these experts, the durability and precision of the parts they install are particularly important. As FAG ensures that every repair can be carried out in the simplest possible manner, FAG packaging includes all of the accessory parts required to perform professional repair work, alongside the wheel bearing itself.

These additional parts make all the difference. The nuts and bolts are equipped with various locking systems and are perfectly tuned to their corresponding wheel bearing and vehicle. An ideal repair solution is only as strong as its individual parts, which is why these parts must be of the highest quality and be provided together with the relevant services. FAG's repair solution ensures that:

- The wheel bearing sits securely in the steering knuckle
- The preload of the wheel bearing remains the same throughout its service life
- The wheel bearing runs as true as possible
- The wheel bearing is protected from unnecessary wear and potential failure

Wheel bearings and their accessory parts together form a system. Quality and the right accessories are therefore essential building blocks in the overall safety design of a wheel bearing. **Together, they form the FAG security system – a system that you can always rely on.**

FAG understands that time is money. If necessary, our packaging therefore contains additional non-verbal installation instructions so you can achieve your goal faster. If you require support, the necessary technical information for all items provided by FAG can be found on the REPERT garage portal. Our service hotline is also available free of charge.

Why FAG wheel bearings are worth it

Wheel bearings are crucial for safety. At FAG, quality is ensured at every stage of the manufacturing process – materials, development, production and testing all meet the most stringent requirements. FAG’s considerable market coverage for passenger vehicles gives the manufacturer an edge over the competition. However, this is not the only reason to choose the brand. With its patented innovations, FAG is the preferred development partner for the automotive industry, continuously driving forward progress and providing the ideal solution for any problem.

- 1 Standard tapered roller bearing**
Dismountable tapered roller bearing
- 2 Generation 1**
Double-row angular ball bearing with/without multipole encoder
- 3 Generation 1T**
Double-row angular tapered roller bearing with/without multipole encoder
- 4 Generation 1**
Double-row angular ball bearing with snap ring, with/without multipole encoder
- 5 Generation 2**
Double-row, sealed angular ball bearing with conventional encoder
- 6 Generation 2**
Double-row, sealed angular ball bearing with multipole encoder
- 7 Generation 2D**
Double-row, sealed tapered roller bearing

Innovations from FAG pave the way for the automotive industry. For example, FAG invented and patented the ball grinder for forming perfectly round balls, heralding the industrialisation of roller bearing production. And with the invention of the orbitally formed shoulder, FAG made it possible to define and preset bearing preload from the start of the bearing's service life, making it safer and easier to replace wheel bearings. The snap ring and face spline provide additional safety and speed up the repair process, while the LFT (low friction torque) seal protects modern FAG wheel bearings highly effectively from contamination and ensures greater efficiency by reducing the amount of friction.

8 Generation 2.1
Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder and snap ring

9 Generation 2.1
Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder and snap ring

10 Generation 3
Double-row, sealed angular ball bearing with orbitally formed shoulder

11 Generation 3
Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder and sensor

12 Generation 3.2
Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder

13 Generation 3.2
Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder, face spline and LFT

Special tool

FAG wheel bearing repair solution for vans,
Ref. Nr. 400 6199 10

A worn wheel bearing is no big deal, as long as it's not an axle housing wheel bearing unit. More and more vehicles are fitted with this solution. This means that to replace the wheel bearing the entire axle housing including the integrated wheel bearing has to be replaced.

With the FAG wheel bearing repair solution for vans, only the bearing itself has to be changed – nothing else.

This effective solution can save up to 50% of a complete hub unit replacement thanks to a reduction in both fitting time and component costs.

It is common knowledge that high mileage and heavy loads lead to bearing damage. Commercial vehicles therefore are particularly often affected. The Mercedes Vito/Viano, Sprinter and the VW Crafter are factory-equipped with wheel bearings permanently installed in the axle housings.

Longer repair times not only mean a lot of lost time for companies and fleet operators

but lost sales as well. This down time can be minimized with the FAG solution – a great advantage for the garage and definitely the best way to build customer loyalty and satisfaction.

Back on the road faster!

A 60% time saving compared to the conventional repair is a clear advantage. This lower cost and faster repair sets a new standard. Short pitstops instead of lengthy repairs mean more scheduling flexibility at the garage.

No wheel alignment, no axle housing replacement – Removal and reinstallation of the axle housing with its required wheel alignment are no longer necessary.

The FAG wheel bearing repair solution for vans is the best pitstop strategy for more efficiency in every garage.

les, ceci est uniquement à des fins de comparaison. L'utilisation de ces informations dans les factures adressées au propriétaire du véhicule n'est pas autorisée.

Des solutions de réparation conçues par des pros pour les pros

Depuis 1883, FAG est le spécialiste des roulements de précision. Ces années d'expérience dans la production de roulements de roue – pièce à forte demande sur le marché – présentent un réel avantage pour les réparateurs qui peuvent ainsi bénéficier du savoir-faire de FAG. Depuis 2005, le programme de kit de roulements de roue FAG est disponible pour le marché de la rechange indépendante. Aujourd'hui, ces kits sont le format le plus sollicité pour les roulements de roue. Les professionnels des ateliers appréciant la qualité, peuvent donc faire confiance à la grande expérience de FAG dans ce domaine.

La longévité et la précision des pièces qu'ils installent leur tient particulièrement à cœur. Parce que FAG veille à ce que chaque réparation soit aussi simple que possible, tous les accessoires nécessaires pour une réparation professionnelle se trouvent dans le kit FAG en plus du roulement de roue.

Ces pièces supplémentaires font toute la différence : les écrous et les boulons, équipés de différents systèmes de sécurité, sont parfaitement adaptés aux roulements de roue et aux véhicules correspondants. Une solution de réparation optimale se mesure à la qualité de ses composants au détail qui la constitue. C'est pourquoi, ces composants doivent être de la plus haute qualité et fournis avec les services adéquats s'y rattachant. C'est ainsi que :

- la position du roulement de roue est sécurisée dans la fusée d'essieu,
- la précharge du roulement de roue est maintenue tout au long de sa durée de vie,
- une fonctionnalité optimale est assurée,
- une usure prématurée ou une éventuelle défaillance du roulement de roue sont évitées.

Le roulement de roue et les accessoires appropriés font partie d'un système à part entière. La qualité et la pertinence des accessoires sont les éléments essentiels du concept de sécurité. **Ensemble, ils forment le système de sécurité FAG, auquel vous pouvez toujours vous fier.**

FAG le sait bien : le temps, c'est de l'argent. C'est pourquoi nos kits contiennent des notices de montage non verbales en complément, si nécessaire. Ainsi, vous parvenez rapidement à votre but. Si vous avez besoin d'aide, les informations techniques nécessaires portant sur toutes les références de la marque FAG sont disponibles sur le site dédié aux garages REPERT. En outre, notre assistance technique téléphonique gratuite est à votre disposition.

Avantages des roulements de roue FAG

Les roulements de roues sont des composants liés à la sécurité. Chez FAG, il est évident que la qualité se retrouve à tous les niveaux. Les matériaux, le développement, la production et les tests répondent aux normes les plus strictes. Grâce à sa couverture la plus large du marché pour les véhicules légers, FAG se démarque singulièrement de ses concurrents. Cependant, ce n'est pas la seule raison en faveur de la marque : avec ses innovations brevetées, FAG est un partenaire de développement privilégié de l'industrie automobile, qui met en avant constamment le développement continu et offre des solutions adéquates à toutes les problématiques.

1 Roulement à rouleaux coniques standard

Roulement à rouleaux coniques désassemblables

2 Génération 1

Roulement à billes à contact oblique double rangée avec/sans encodeur multipolaire

3 Génération 1T

Roulements à rouleaux coniques à double rangée avec/sans encodeur multipolaire

4 Génération 1

Roulement à billes à contact oblique à double rangée avec bague de sécurité et avec/sans encodeur multipolaire

5 Génération 2

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec encodeur classique

6 Génération 2

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec encodeur multipolaire

7 Génération 2D

Unité de roulement de roue compacte avec roulement à rouleaux coniques à double rangée

Les innovations de FAG ont valeur d'exemple pour l'industrie automobile. Ainsi, FAG n'a pas seulement inventé et breveté la machine à rectifier des billes, pour des billes parfaites, mais a alors amorcé l'industrialisation de la production de roulements en série. Avec l'invention de l'épaulement à formation orbitale, FAG veille à ce que la précharge du roulement soit définie et réglée dès le début. Remplacer un roulement de roue est ainsi devenu plus facile et plus sûr. La couronne de blocage et la denture droite offrent davantage de sécurité et contribuent à des procédures de réparation plus rapides. En parallèle, le joint à faible frottement LFT protège très efficacement les roulements de roue FAG modernes contre la saleté, tout en assurant une plus grande efficacité en réduisant le frottement.

8 Génération 2.1

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaulement à formation orbitale, encodeur multipolaire et bague de sécurité

9 Génération 2.1

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaulement à formation orbitale, encodeur multipolaire et bague de sécurité

10 Génération 3

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaulement à formation orbitale

11 Génération 3

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaulement à formation orbitale, encodeur multipolaire et capteur

12 Génération 3.2

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaulement à formation orbitale et encodeur multipolaire

13 Génération 3.2

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaulement à formation orbitale, encodeur multipolaire, denture frontale et technologie LFT (Étanchéité à friction réduite)

Outillage spécial

Solution de réparation FAG VUL,
référence 400 6199 10

L'endommagement d'un roulement de roue n'est pas un problème insolvable tant qu'il ne s'agit pas d'une fusée d'essieu complète avec unité de roulement de roue déjà pré-montée. Or, de plus en plus de véhicules présentent ce type de montage. De ce fait, lors de l'entretien-réparation, il est impératif de remplacer la fusée d'essieu complète avec l'unité de roulement de roue déjà pré-montée.

Avec la solution de réparation FAG VUL, seule l'unité de roulement de roue est à remplacer, et rien d'autre!

Cette solution efficace permet d'économiser plus de 50 % des coûts au total et d'éviter de nombreuses manipulations.

En général, l'endommagement des roulements résulte de kilométrages élevés et de fortes sollicitations. Les véhicules utilitaires sont donc particulièrement concernés. Les modèles Vito, Viano et Sprinter de Mercedes ainsi que le VW Crafter sont équipés en première monte de fusées d'essieu avec roulement intégré.

De longues durées d'intervention pour la réparation signifient pour les entreprises et les gestionnaires de flottes non seulement une sérieuse perte de temps, mais aussi un manque à gagner en termes de chiffre d'affaires. Avec la solution de réparation FAG VUL, les durées d'immobilisation sont significativement réduites. Un argument sans appel pour l'atelier et la meilleure solution pour une clientèle fidèle et satisfaite.

Plus vite de nouveau sur la route!

Gagner jusqu'à plus de 60% de temps sur la réparation par rapport à une réparation traditionnelle est un avantage incontestable! Plus abordable et plus rapide, ce type de réparation instaure un nouveau standard. La solution FAG permet une réduction de l'immobilisation du véhicule et donc un meilleur taux d'occupation de l'atelier.

Avec la solution FAG, plus besoin de faire la géométrie ni de remplacer la fusée d'essieu.

La solution de réparation FAG VUL, c'est la garantie de plus d'efficacité dans chaque atelier.

Schaeffler REPERT

La marque de services pour les pros de l'atelier.

Avec REPERT, nous vous offrons des prestations de services complètes autour de nos produits et de nos solutions de réparation LuK, INA et FAG. Cherchez-vous des informations ciblées pour un diagnostic des pannes ? Ou avez-vous besoin d'outils concrets pour vous faciliter le quotidien à l'atelier ? Sur le portail en ligne, via l'assistance téléphonique ou lors d'événements, REPERT vous offre toutes les prestations de services techniques.

tes de vehículos, se hará únicamente a efectos comparativos. No se permite el uso de dicha información en las facturas al propietario del vehículo.

Soluciones de reparación entre profesionales

Desde 1883, FAG es experto en rodamientos de precisión. Esta dilatada experiencia con una pieza sometida a un uso tan intensivo como lo es el rodamiento de rueda constituye una gran ventaja para el taller, ya que se beneficia de los conocimientos de FAG. La gama de juegos de rodamientos de rueda de FAG está disponible en el mercado de recambios desde 2005. En la actualidad forman parte de los rodamientos de rueda más demandados. Los profesionales de los talleres aprecian la calidad y, por tanto, apuestan por la amplia experiencia de FAG.

Dan especial importancia a la durabilidad y precisión de las piezas que ellos mismos montan. Dado que FAG se preocupa por facilitar cada reparación al máximo, en los embalajes de FAG se incluyen, además de los rodamientos de rueda, todos los accesorios necesarios para garantizar una reparación profesional.

Y son precisamente esas piezas complementarias las que marcan la diferencia: Los tornillos y tuercas equipados con diferentes sistemas de seguridad se ajustan perfectamente al rodamiento de rueda y vehículo correspondiente. Una solución de reparación perfecta es la suma de las piezas individuales, junto con una alta calidad y un servicio técnico a la altura de las expectativas. De esta forma:

- Se asegura la fijación del rodamiento de rueda al muñón del eje
- Se mantiene de forma duradera la precarga del rodamiento de rueda
- Se garantiza una concentricidad óptima
- Se evita el desgaste innecesario y un posible fallo del rodamiento de rueda.

El rodamiento de rueda y el accesorio correspondiente se entienden como un único sistema. La calidad y el accesorio inteligente son los pilares fundamentales del concepto de seguridad. **Juntos constituyen el sistema de seguridad FAG, que le brinda una confianza absoluta.**

FAG entiende que el tiempo es dinero. Por ello, nuestros embalajes contienen también instrucciones de montaje no verbales siempre que sean necesarias, lo que permite actuar de manera más rápida. En caso de necesitar asistencia, en el portal para talleres de REPERT encontrará la información técnica necesaria referente a todos los artículos de la casa FAG. Además, ponemos a su disposición nuestra línea de atención técnica gratuita.

¿Por qué merece la pena apostar por los rodamientos de rueda FAG?

Los rodamientos de rueda son componentes relevantes para la seguridad. En FAG, la calidad es inherente a todos los niveles. El material, el desarrollo, la fabricación y las pruebas cumplen las máximas exigencias. FAG tiene una presencia en el mercado de los turismos especialmente destacada entre la competencia. Pero ese no es el único punto fuerte de la marca; gracias a sus innovaciones patentadas, FAG es el socio de desarrollo preferido en la industria automovilística, impulsa el desarrollo continuo y ofrece la solución adecuada frente a cualquier problemática.

1 Rodamiento de rodillos cónicos estándar

Rodamiento de rodillos cónicos desmontable

2 Generación 1

Rodamiento de bolas de contacto angular de dos hileras con/sin codificador multipolar

3 Generación 1T

Rodamiento de rodillos cónicos de dos hileras con/sin codificador multipolar

4 Generación 1

Rodamiento de bolas de contacto angular de dos hileras con corona de bloqueo y con/sin codificador multipolar

5 Generación 2

Rodamiento de bolas de contacto angular estanco de dos hileras con codificador convencional

6 Generación 2

Rodamiento de bolas de contacto angular estanco de dos hileras con codificador multipolar

7 Generación 2D

Rodamiento de rodillos cónicos estanco de dos hileras

Las innovaciones de FAG marcan tendencia en la industria automovilística. FAG no solo ha creado y patentado la máquina rectificadora de bolas para conseguir bolas perfectas, iniciando así la industrialización de la producción de rodamientos. Con la invención del proceso de conformado orbital FAG hizo posible definir y preajustar la tensión previa del rodamiento desde el principio. Desde entonces, el cambio de rodamientos de rueda resulta más sencillo y seguro. La corona de bloqueo y el dentado Hirth aportan mayor seguridad y permiten agilizar los procedimientos de reparación. Al mismo tiempo, la junta de baja fricción LFT protege eficazmente los modernos rodamientos de rueda FAG frente a la suciedad y proporciona también mayor eficiencia debido a la fricción reducida.

8 Generación 2.1

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital, codificador multipolar y corona de bloqueo

9 Generación 2.1

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital, codificador multipolar y corona de bloqueo

Herramienta especial

Herramienta para la instalación de Kit de rodamientos de rueda FAG en comerciales ligeros.
Referencia 400 6199 10

EL cambio de un rodamiento de rueda no supone un gran problema a no ser que tratemos un vehículo con el rodamiento integrado en la mangueta formando una unidad. Cada vez más vehículos incorporan esta solución. En este caso, la única opción de reparación hasta ahora era cambiar toda la mangueta con el rodamiento de ruedas integrado.

¡Con la solución de reparación de rodamientos de ruedas FAG para comercial ligero se cambian solo los rodamientos y nada más!

Esta solución efectiva ahorra más del 50 % de los costes totales.

Un elevado kilometraje unido a altas cargas en el vehículo son causas conocidas que conducen a daños en los rodamientos de rueda. Los comerciales ligeros son por ello especialmente susceptibles a un posible cambio de este componente. Los modelos de Mercedes Vito, Viano y Sprinter, así como el VW Crafter, vienen de fábrica con rodamientos de ruedas integrados en el buje.

Las largas reparaciones suponen una pérdida de tiempo y de oportunidades de negocio para empresas y gestores de flotas. Minimizar los tiempos de inactividad con la solución de reparación FAG: un buen argumento para el taller y la mejor solución para fidelizar y dejar satisfechos a los clientes.

¡Intervenciones más rápidas!

Conseguir más del 60 % de ahorro de tiempo frente a una reparación convencional presenta claras ventajas. La reparación más barata y rápida marca nuevas tendencias. En vez de largos tiempos de inactividad, más flexibilidad en la planificación del taller.

Sin tener que alinear, sin cambio de mangueta: dado que se prescinde por completo del montaje y desmontaje de la mangueta de la correspondiente medición de eje.

La solución de reparación de rodamientos de ruedas FAG para comerciales ligeros es la estrategia mejor y más eficiente para las reparaciones en cualquier taller.

Schaeffler REPERT

La marca de servicios para talleres profesionales

A través de REPERT ofrecemos numerosos servicios para todos nuestros productos y soluciones de reparación de LuK, INA y FAG. ¿Busca información específica para el diagnóstico de averías? ¿O necesita herramientas concretas que faciliten el trabajo diario en el taller? Portal en línea, línea de atención técnica, eventos... REPERT pone a su disposición todo tipo de servicios técnicos.

PARA TRABAJAR

- › Gama de productos
- › Catálogo en línea de REPERT
- › Instrucciones de montaje
- › Ventajas de productos
- › Programa de puntos mejorado
- › Diagnóstico de averías

PARA APRENDER

- › Conocimiento del producto
- › Oferta y contenidos de formación
- › Vídeos de ayuda

PARA INFORMARTE

- › Calendario de eventos
- › Novedades en productos, servicios y mucho más

Regístrese ahora gratis y en solo unos pasos en:

WWW.REPERT.ES

TecDoc

¿Actualización o ampliaciones del catálogo? ¡Se acabaron los problemas!

Aproveche las posibilidades que le brinda el DVD TecDoc. Ud. tiene así la seguridad de disponer trimestralmente de los datos de catálogo actualizados para su actividad diaria.

pezzi di ricambio dei produttori del veicolo, il fine è esclusivamente comparativo. Non è consentito un utilizzo di simili dati nelle fatture emesse al proprietario del veicolo.

Soluzioni di riparazione da professionisti per professionisti

FAG è il professionista dei cuscinetti di precisione dal 1883. Poter usufruire di questa esperienza di lunga tradizione, per un componente sottoposto a sollecitazioni così elevate come è il cuscinetto ruota, rappresenta un vantaggio decisivo per l'officina che in questo modo trae diretto vantaggio dal know-how FAG. La gamma di soluzioni di riparazione per cuscinetti ruota FAG risale al 2005 sul mercato dei ricambi. Attualmente sono i cuscinetti più richiesti sul mercato. I professionisti dell'officina danno grande importanza alla qualità e si affidano quindi alla lunga esperienza di FAG.

Per gli autoriparatori la lunga durata e la precisione dei componenti che utilizzano è della massima importanza. Poiché FAG assicura che ogni riparazione riesca nel modo più semplice possibile, le confezioni FAG oltre al cuscinetto ruota contengono anche numerosi accessori necessari per una riparazione a regola d'arte.

E sono proprio questi componenti aggiuntivi a fare la differenza: le viti e i dadi, cui sono associati diversi sistemi di sicurezza, sono predisposti per abbinarsi alla perfezione al cuscinetto ruota e al veicolo specifici. Perché una soluzione di riparazione perfetta è il risultato dei singoli componenti di cui è composta: alta qualità, con i rispettivi servizi. In questo modo si ottiene un risultato in cui

- la sede del cuscinetto ruota è assicurata al fuso,
- il precarico del cuscinetto ruota si conserva a lungo,
- viene garantita una coassialità ottimale e
- si evita un'inutile usura che potrebbe determinare il guasto del cuscinetto ruota.

Il cuscinetto ruota e gli accessori a esso associati vanno considerati come un sistema unico. La qualità e gli accessori intelligenti sono gli elementi essenziali del concetto di sicurezza. **Assieme questi due elementi creano il sistema di sicurezza FAG, un sistema su cui potete sempre fare affidamento.**

FAG lo sa: il tempo è denaro. Per questo motivo alle nostre confezioni sono associate anche istruzioni non verbali, qualora necessario. In questo modo raggiungete rapidamente l'obiettivo. Gli operatori che hanno bisogno di supporto, tuttavia, possono trovare le necessarie informazioni su tutti i prodotti del marchio FAG sul portale per le officine REPPERT. È inoltre possibile accedere alla nostra Hotline di assistenza gratuita.

È per questo motivo che risulta conveniente scegliere cuscinetti ruota FAG

I cuscinetti ruota sono componenti di grande rilevanza per la sicurezza. Nei prodotti FAG, la qualità è un fatto ovvio su tutti i livelli. Materiale, sviluppo, lavorazione e test soddisfano i requisiti più elevati. La più grande copertura di mercato nel settore delle autovetture mette in evidenza FAG rispetto alla concorrenza. Ma non è solo questo che va a favore del marchio: grazie alle sue innovazioni brevettate, FAG è un partner di sviluppo privilegiato dell'industria automobilistica, fa progredire costantemente lo sviluppo tecnologico e offre la soluzione adeguata per tutti i problemi.

- 1 Cuscinetto conico standard**
Cuscinetto conico smontabile
- 2 Generazione 1**
Cuscinetto per spinte oblique a 2 solchi con/senza encoder multipolo
- 3 Generazione 1T**
Cuscinetto conico a 2 solchi con/senza encoder multipolo
- 4 Generazione 1**
Cuscinetto per spinte oblique a 2 solchi con corona di blocco e con/senza encoder multipolo

- 5 Generazione 2**
Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con encoder tradizionale
- 6 Generazione 2**
Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con encoder multipolo
- 7 Generazione 2D**
Cuscinetto conico a 2 solchi impermeabilizzato

Le innovazioni FAG sono determinanti per l'industria automobilistica. Per questo motivo FAG non solo ha inventato e brevettato la rettificatrice per produrre sfere perfette, introducendo in tal modo l'industrializzazione della produzione dei cuscinetti a rotolamento. Grazie alla tecnologia per la formatura orbitale, FAG ha fatto in modo che il precarico del cuscinetto sia definito e preimpostato fin dall'inizio. In questo modo la sostituzione del cuscinetto ruota è divenuta più semplice e sicura. La corona di blocco e la dentatura frontale contribuiscono al raggiungimento di un grado più elevato di sicurezza e rendono più veloci le procedure di riparazione. Al tempo stesso la guarnizione LFT per le basse viscosità protegge con grande efficienza i moderni cuscinetti ruota FAG dalle impurità e, al tempo stesso, garantisce maggiore efficienza grazie al livello più basso di attrito.

8 Generazione 2.1

Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con spallamento a formatura orbitale, encoder multipolo e corona di blocco

9 Generazione 2.1

Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con spallamento a formatura orbitale, encoder multipolo e corona di blocco

10 Generazione 3

Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con spallamento a formatura orbitale

11 Generazione 3

Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con spallamento a formatura orbitale, encoder multipolo e sensore

12 Generazione 3.2

Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con spallamento a formatura orbitale ed encoder multipolo

13 Generazione 3.2

Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con spallamento a formatura orbitale, encoder multipolo, dentatura frontale e guarnizione per basse viscosità

Utensile speciale

Utensile Speciale per la riparazione dell'unità cuscinetto FAG sui veicoli commerciali leggeri
n. art. 400 6199 10

Normalmente i danni ai cuscinetti si verificano in caso di funzionamento a lunghe percorrenze e forti sollecitazioni. I veicoli commerciali sono pertanto quelli più soggetti a questi problemi.

Attualmente alcuni produttori di veicoli offrono un'unità cuscinetto ruota preassemblata, che include il giunto dello sterzo. In questo modo, il giunto dello sterzo dovrebbe essere sostituito insieme al cuscinetto ruota, rendendo necessaria la regolazione dell'asse. E' questo il caso per es. dei modelli Mercedes Vito, Viano e Sprinter e il VW Crafter.

Con FAG, Schaeffler Automotive Aftermarket offre un'alternativa per la riparazione. Il giunto dello sterzo rimane installato nel veicolo. Utilizzando l'utensile speciale, è possibile sostituire il solo cuscinetto ruota, senza che si renda necessaria questa regolazione.

Questa efficace soluzione permette di ridurre i costi dell'intervento.

Lunghi fermi veicolo significano per le aziende e i gestori di flotte non solo un'elevata perdita di tempo, ma anche una riduzione del fatturato. Con la soluzione di riparazione FAG i tempi di inattività sono ridotti al minimo. Questo è un forte argomento a favore dell'officina e la migliore soluzione per fidelizzare il cliente e soddisfarlo pienamente.

Oltre il 60% di tempo risparmiato rispetto a una riparazione classica rappresenta un chiaro vantaggio. La riparazione più rapida e a prezzo inferiore diventa la regola.

Non è più necessario misurare, sostituire, smontare e rimontare l'assale con relativa nuova misurazione.

La soluzione di riparazione FAG per veicoli commerciali leggeri è la migliore strategia commerciale per una maggiore efficienza in officina.

Esempio

Ricerca della parte di ricambio idoneo
per un autoveicolo - Esempio:
Asse posteriore, Audi A4 1.8T, 132kW, AJL,
11/99, WAUZZZ8DZX1234567

Articolo corrispondente al codice motore:
713 6103 70

- ① Cercare l'autoveicolo nell'elenco
- ② tenere conto dei kW e delle informazioni aggiuntive
- ③ Cercare il codice dell'articolo

Schaeffler REPERT

Il marchio dell'assistenza per i professionisti dell'officina.

Con REPERT offriamo servizi completi sui nostri prodotti e soluzioni di riparazione LuK, INA e FAG. Siete alla ricerca di informazioni specifiche per la diagnosi dei guasti? Oppure di strumenti concreti di lavoro per facilitare le procedure di officina? Sul portale online, con l'hotline di assistenza o nel corso di eventi di formazione, REPERT vi offre tutti i servizi tecnici che cercate.

PER IL LAVORO

- › Gamma di prodotti
- › Catalogo online REPERT
- › Istruzioni di montaggio
- › Vantaggi dei prodotti
- › Gestione bonus migliorata
- › Diagnosi dei guasti

PER L'APPRENDIMENTO

- › Conoscenze sui prodotti
- › Offerte di corsi di formazione e contenuti delle sessioni
- › Video formativi pratici

PER L'INFORMAZIONE

- › Calendario eventi
- › Novità su prodotti, servizi e molto altro ancora

Registrarsi è gratis e richiede solo pochi clic in:
WWW.REPERT.IT

TecDoc

Aggiornamenti del catalogo? D'ora in avanti niente più problemi!

Approfittate delle possibilità che vi offre il DVD TecDoc. Il DVD vi mette a disposizione ogni tre mesi l'aggiornamento dei dati del catalogo per la vostra attività.

Potete ordinare a:

TecAlliance GmbH
Arnikaweg 3
D-51109 Köln
Tel. +49 (0) 221/66 00-112
Fax +49 (0) 221/66 00-100
